

AVONDALE
TERRA EST VITA

THE JOURNEY

Avondale Estate, established in Paarl 1694, is led by *biodynamic viticulturist Johnathan Grieve*, embraces the philosophy "*Terra Est Vita*" (Soil is Life) promoting an *interconnected system* of soil, water, energy, plants, animals, and people. As a pioneering, certified Organic and Biodynamic producer in South Africa, this family owned estate of the Grieve family crafts unique wines produced on 13 different soil types.

Pekin ducks, known as *Jonty's Ducks*, are used to control snail populations in the vineyards, eliminating the need for chemicals. The estate features an advanced *underground gravity-flow cellar*, *Georgian Qvevri* and employs organic composts and biodiversity practices to sustain a healthy vineyard ecosystem, ensuring high-quality vintages embracing their 'next level' holistic approach with nature.
