

BRUNIA

THE JOURNEY

Organically farmed, family estate wines in the premier Sondagskloof cool-climate region, of the daring *Cold Mountain* in the Cape South Coast by brothers Wade and Brett Sander in pursuit of excellence and sustainability. The estate's pristine *fynbos* landscape is home to the rare *Brunia laevis* (Silver Brunia) plant, which inspired the winery's distinctive name and brand identity. Brunia is a Black-owned estate.

The Sander brothers are converting to an organic and biodynamic operation. Their philosophy centers on the conviction that outstanding wines require exceptional grapes, *driving significant investments in soil health* and sustainable farming practices despite reduced yields and higher costs during the conversion process.
